

Welcome!

## 2025 Public Safety Communications Summit

The Summit Planning Committee and our valued sponsors want to thank you for taking the time to participate in the Statewide Public Safety Radio Summit.

Public safety communications in Colorado face many unique challenges due to our vast and diverse landscape, as well as technology advances that are hitting all of us like ‘rapid-fire’. The intent of the Summit is to be a vendor neutral and a system neutral event.

The goal of the Summit is to provide information and educational topics to support and encourage radio operability and interoperability across Colorado.
